

Calcium Alginate Tipped Applicator-Dry Transport System

Standard calcium alginate tip, polystyrene handle

Description

Puritan's polypropylene dry transport tube and plug-style cap is perfect for specimen collection and transportation to the lab or use in diagnostic kits. This specialty applicator is tipped with calcium alginate fiber, an organic material derived from seaweed and carded in Puritan's facility to assure conformance with medical device specifications. It is bonded securely to a semi-flexible polystyrene handle by an aqueous based adhesive.
